SIP-010 Allocating treasury Dai to more Curve Farming pools

SIP-010 Allocating treasury Dai to more Curve Farming pools

Background:

It's time to put more of our treasury to work. our treasury holds \$44M Dai at the time of writing. It makes sense to utilize the treasury Dai to participate yield farming on risk-free pools on Curve (geist and 2pool for example).

Previously we have planned to allocate \$5M dai in the Lambda-2Pool of Spatacadabra on Curve. SIP-010 involves only 3rd party Curve pools such as Geist pool or 2Pool, of which we will try to balance to get the best total yields.

Future allocations in Lambda Curve pools will be proposed separately.

Proposal:

Allocate \$10M treasury Dai to Curve yield farming pools. Spartacus treasury will start accumulating farming rewards in CRV, wFTM, GEIST and curve tx fees.

Vote to support the proposal.

Yea: for the proposal

Nay: against the proposal

SIP-014 FTM-Tomb LP Farming on Solidex

Closed

Spartacus DAO by 0x5479...706a

Core

↑ Share

...

Background:

We have been preparing for the deployment of the FTM in Spartacus treasury for a while. We have always put the funds safety as first priority in the past. We are now ready to put our treasury FTM (~5M wFTM) to good use and earn returns for SPA holders.

We will use part of the earnings to buyback SPA tokens which will be burned and taken out of circulation.

Proposal:

Deploy 5M FTM into FTM-Tomb LP farming. The destination pool would be the new FTM-Tomb LP on Solidex (farm Solid and Sex tokens) which is currently earning 172% APR (110.7% Solid, 61.5% SEX) without boosting.

Details here: <https://solidexfinance.com/#/pools>

Total TVL on Solidex is \$2.3B as of writing.

This requires us to swap 50% FTM into Tomb to participate the FTM-Tomb LP farming. The FTM-Tomb pool on solidly.exchange has 170M liquidity and shall be sufficient enough for the swap.

The tomb team has also been incentivizing the pool and there is a high chance they will continue to do so in the near future:
